Jaya Suriya Suresh

MSc Supply Chain Management student, available for a 6-month internship from April 2027

Rouen, France · +33 7 45 54 22 53 · Jayasuriya.0904@gmail.com · linkedin.com/in/jaya-suriya-s · jayasuriya-suresh.github.io

Profile

Supply chain master's student at NEOMA Business School with **1 year 6 months in supply chain operations** (aggregates production, India), from incoming orders to **customer delivery**. Experienced in **demand and supply planning**, **KPI reporting**, **root-cause analysis** and **process improvement**, working daily with production, suppliers, transporters and clients. Builds **Power BI dashboards** and analyses data with Excel, SQL and Python. Studied in India and France.

Education

NEOMA Business School, Rouen, France — 2026 – present

MSc Supply Chain Management

Courses: Supply Chain Modelling, Strategic Supply Chain Management, Transportation and Logistics, Strategic Purchasing, International Procurement, Information Systems for SCM, Efficient Production & Operations, Python for SCM, Green Supply Chain.

Dissertation (in progress): Facility location in collaborative supply chains. Building a **mixed-integer linear programming (MILP)** model in which several companies decide together where to open shared warehouses and how to serve customers at the lowest facility and **transport cost**, then simulating scenarios and testing fair **cost-allocation** methods (Shapley value) to draw **managerial insights**.

NEOMA Business School, Rouen, France — 2025 – 2026 (1 year)

International Pre-Master

Courses: Supply Chain Foundations, Optimization Tools for Supply Chain, Predictive Analytics, Algorithmic Thinking, Financial Analysis, Cross-Cultural Management.

SRM University, Chennai, India — 2020 – 2023 (3 years)

Bachelor of Business Administration · CGPA 8.17/10

Applied projects, Data Analytics Certification, Skill Spire Technologies, Chennai — Oct – Dec 2023 (3 months)

Retail sales performance dashboard, *Power BI (DAX), Power Query, Excel*

Combined 3 retail data sources into a 4-page **Power BI dashboard** tracking 6 **KPIs** on sales, profit and product performance, to prioritise products for **replenishment** and spot under-performing items.

Customer segmentation for stock allocation, *SQL (Google BigQuery), Excel*

Joined order-item and product tables in **SQL** to split theLook e-commerce customers into 5 RFM segments, then built **stock allocation** scenarios by segment to limit stockouts and overstock.

Product demand trend analysis, *Python (Pandas, Matplotlib)*

Cleaned one month (31 days) of smart-device usage data from 33 users across 18 CSV files and turned daily and hourly **demand patterns** into 3 **inventory and distribution** recommendations.

Experience

S.P.S Blue Metals, construction aggregates, India — Mar 2024 – Aug 2025 (1 year 6 months)

Supply Chain Coordinator

Cut **late deliveries by about 15%** by analysing order and delivery data in **Excel** to find recurring causes, then leading **corrective actions** and new **order-to-delivery procedures**.

Coordinated **up to 10 truck dispatches a day** between quarry production, **3 transport partners** and a core portfolio of **B2B clients**, tracking **delays** and flagging risks early.

Balanced **demand and supply** daily across **5–10 SKUs**, comparing **SKU-level stock** and production with incoming orders to prevent shortfalls.

Built **weekly KPI reports in Excel** (dispatch volumes, on-time delivery, delays) used by management to follow performance and **prioritise orders**.

L&T Construction, Chennai, India — Dec 2022 – Feb 2023 (3 months)

HR Intern

Coordinated sourcing, screening and interview schedules with **hiring managers** for **20+ candidates**.

Organised and ran **onboarding and training sessions** for new hires.

Wrote and structured the **process documentation** of the talent-acquisition process, reused in later hiring cycles.

Skills

Supply chain: demand and supply planning, forecasting, SKU-level inventory, transport coordination, network design (MILP)

Analysis & improvement: KPI dashboards, data analysis, root-cause analysis, corrective actions, process improvement

Tools: Advanced Excel, Power BI (DAX, Power Query), MS Office, SAP (ERP), SQL (BigQuery), Python (Pandas, Matplotlib)

Languages: English (fluent), French (A2)
